# ANACONDA

from pipe to condenser

## Why Brass Pipe ?

TRADE MARK

*Because it endures*—it will not split. Water will not rust it. It will not clog or leak. Money spent in tearing out and replacing corrodible pipe is saved.

*Because it insures*—rugs and furnishings are safe from stains of leaking water. Ceilings will not fall or be made unsightly. The homeowner will be spared the annoyance of rusty water in his bathtub. No fear of torn out walls and ripped up floors. None of the confusion and expense that follow in the footsteps of the repair man.

*And the added cost is almost negligible.* Less than 1 per cent of building cost will cover the extra cost of Anaconda Brass Pipe over corrodible pipe. The difference is about \$75 for a \$15,000 house. For a 12-story apartment house, in which the total plumbing cost is \$60,000, the added cost of Anaconda Brass Pipe is approximately \$1,000.

*Anaconda Brass Pipe is trademarked and guaranteed.*

Publication B I includes detailed figures on installation costs and installation practice. It will be sent free on request.

## 1,000 pounds per square inch

Every piece of brass pipe that bears the Anaconda trademark is subjected to an internal hydraulic pressure of 1,000 pounds per square inch before it leaves the mill.

This pressure test will disclose even the slightest flaw in the metal—a flaw which the eye could not detect but which might result in a leak, once the pipe was installed. If the slightest defect is found, the pipe is rejected and scrapped.

Other tests—more far-reaching than those of actual service—make certain that the pipe meets Anaconda standards: Analytical tests to check the alloy. Tensile strength tests to check the physical structure. Special tests to safeguard the user against failure by splitting.

Anaconda Brass Pipe meets these tests because The American Brass Company has, through more than a century of experience, acquired a knowledge of improved methods and a technical skill in manufacturing which enables it to control the quality of its pipe at every stage of production. The trademark which is stamped in every length of Anaconda Brass Pipe is a guarantee of quality and dependability.

## One reason why Mt. Sinai is a model Hospital

**E**XPERTS in sanitation co-operated with Mr. Arnold W. Brunner, the architect of Mt. Sinai Hospital, in New York, to build a structure which would incorporate every sanitary expedient for rapid and efficient service.

It is, therefore, significant that in this model institution brass pipe, manufactured by the American Brass Company, has been consistently employed for the water lines and Benedict Nickel, another Anaconda product, for the faucets and plumbing fixtures in kitchen, lavatories, toilet rooms, operating rooms and patients' rooms.

Anaconda Brass Pipe resists corrosion and water drawn from it is always as clear and pure as its source. Benedict Nickel is white clear through and never needs replating.

Apart from sanitary reasons, Anaconda Brass Pipe and Benedict Nickel commend themselves for hospital use, because they reduce maintenance costs.

# Anaconda Brass Pipe

to reduce maintenance costs—

From a sketch by  
Samuel Chamberlin

Eleven story apartment house at 10 East 88th  
Street, New York, completely equipped with Ana-  
conda Brass Pipe. Architects: Litchfield and  
Rogers. Plumbing Contractors: W. G. Cornell  
and Co. Owners: The Almah Corporation.

BY specifying Anaconda Brass Pipe for the water service lines in the eleven story apartment house at 10 East 88th Street, New York, Messrs. Litchfield and Rogers, Architects, made certain that the plumbing would be as permanent as the building.

According to W. G. Cornell and Company of New York, the plumbing contractors, it cost only \$2,800 more to install Anaconda Brass Pipe than corrodible pipe. Six per cent of the total plumbing cost spent for brass pipe assures permanency and complete freedom from rusty water annoyance, expensive repairs and replacements—a small price for plumbing insurance.

Anaconda Brass Pipe is trademarked and guaranteed. Specify it by name. It costs no more than ordinary brass pipe.

# A GUARANTEE

**A**NACONDA BRASS PIPE is absolutely guaranteed. This complete assurance of perfect service is made possible by improved methods of manufacture, backed by a system of inspection which permits no pipe to leave our mills until its freedom from defects has been demonstrated in tests exceeding those of actual service.

Brass Pipe made by The American Brass Company can be identified by the Trademark—ANACONDA—stamped in the metal.

McCreery Department Store, Pittsburgh.  
Architects: Graham, White, Pabst and  
Anderson, Chicago. Fire Extinguisher  
System installed by the General Fire Ex-  
tinguisher Co.

## Anaconda Brass Pipe *always justifies its selection*

**W**HEN the McCreery Department Store of Pittsburgh, Pa., was built over eighteen years ago, it was decided to use brass pipe manufactured by The American Brass Company for the concealed work of the sprinkler system.

Eighteen years of uninterrupted service has justified the decision. The corrosion-resisting brass pipe is still in place and reveals no sign of deterioration. Maintenance charges have been entirely eliminated.

The architect who specifies Anaconda Guaranteed Brass Pipe protects his client against plumbing maintenance charges—an important consideration in planning present-day buildings.

Write for bulletin "Brass Pipe for Water Service." It gives valuable information on plumbing and comparative costs.

Brass Pipe with this trademark stamped in the metal is guaranteed by The American Brass Company

## THE AMERICAN BRASS COMPANY

General Offices: Waterbury, Conn.

Offices and Agencies in the principal cities

In Canada: ANACONDA AMERICAN BRASS LIMITED, New Toronto, Ontario

Please mention ARCHITECTURE in writing to manufacturers
